Scrubber dryer robots are robotic devices designed to clean and dry floors or other surfaces. These robots are equipped with mechanisms such as rotating brushes or pads for scrubbing and squeegees or other drying components. They use advanced sensor technology to navigate around obstacles, map the area to be cleaned, and determine the most efficient cleaning path. They are often used in large commercial or industrial settings like warehouses, supermarkets, and airport terminals to maintain clean and dry floors with reduced human labor. They can work autonomously, following pre - programmed schedules or commands, and can significantly improve the efficiency and consistency of the cleaning process compared to traditional manual methods.
