The report requires updating with new data and is sent in 48 hours after order is placed.

Securitization also helps banks to sell off their NPAs to asset reconstruction companies (ARCs). ARCs, which are typically publicly / government owned, act as debt aggregators and are engaged in acquiring bad loans from the banks at a discounted price, thereby helping banks to focus on core activities. On acquiring bad loans ARCs restructure them and sell them to other investors as 'Pass Through Certificates' (PTCs), thereby freeing the banking system to focus on normal banking activities.
