A security fixed focus lens is a type of camera lens designed for security and surveillance applications. Unlike traditional camera lenses with variable focal lengths, fixed focus lenses have a fixed focal length and a fixed focus point, meaning that they cannot be adjusted for zooming in or out.

The global surveillance industry continued to experience growth, driven by factors such as increased security concerns, urbanization, and the need for public safety. This growth had a direct impact on the demand for security fixed focus lenses used in various surveillance systems. There was a growing demand for high-resolution imaging in surveillance and security applications. Security fixed focus lenses were being designed to work in conjunction with high-definition cameras to capture detailed and clear images.
