Self Luminous Exit Sign is a special signage system that emits a bright light without external light sources, clearly indicating the location of exits. This kind of sign is designed to provide people with quick and clear escape guidance in emergency situations, such as fires, earthquakes, etc., to ensure people's life safety.

The core technology of Self Luminous Exit Sign lies in the self-luminous material it uses. This material can absorb light energy and release it when needed to achieve continuous light emission. Compared with traditional signs that rely on external light sources, Self Luminous Exit Sign is more reliable and independent and is not affected by external power failure or lighting system failure.
