The global Self-priming Mud Pump market size is predicted to grow from US\$ 706 million in 2025 to US\$ 1060 million in 2032; it is expected to grow at a CAGR of 6.0% from 2026 to 2032.

In 2025, global sales of self-priming mud pumps reached 390,000 units, with an average selling price of US\$1,850 per unit. Self-priming mud pumps are a type of wear-resistant centrifugal pump capable of rapid self-priming without priming. They are suitable for conveying high-solids-content mud, mortar, sewage, and particulate media, and are widely used in foundation construction, drilling circulation, river dredging, mine slurry discharge, municipal sewage, and emergency flood drainage. The product consists of a pump body, impeller, wear-resistant liner, self-priming chamber, mechanical seal, and power system, featuring easy start-up, anti-clogging, high wear resistance, and low maintenance costs. Upstream raw materials include cast iron/ductile iron, stainless steel, wear-resistant alloy steel, rubber liners, polyurethane, mechanical seals, and motors or diesel engines. Suppliers are concentrated in metal smelting, foundries, sealing component manufacturers, and power equipment manufacturers. Downstream customers include engineering contractors, drilling companies, mining companies, municipal environmental protection departments, and dredging units. The global total production capacity is approximately 520,000 units per year, with an average gross profit margin in the range of 18-26%. Demand and opportunity analysis shows that increased global infrastructure investment, upgrades in urban sewage treatment, and increased mining intensity all contribute to stable demand. At the same time, rising demand for river and lake silt treatment, emergency flood control equipment, and 'one pump for multiple purposes' equipment makes high-lift, high-flow, and wear-resistant self-priming mud pumps have growth potential.

United States market for Self-priming Mud Pump is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
