Abstracts

A personal fall limiter is essentially a compact, lightweight self-retracting lifeline that has a relatively short working length, typically six to nine feet. What makes the device “personal” is that the body of the retractable unit can be attached directly to the back D-ring on a worker’s full-body harness and can be carried on the worker’s back. This “reverse configuration” offers an advantage over many standard self-retracting lifelines, which must be secured at the anchor point.

The global market for Self-Retracting Personal Fall Limiter (PFL) is estimated to increase from US\$ million in 2021 to reach US\$ million by 2028, exhibiting a CAGR of % during 2022-2028. Keeping in mind the uncertainties of COVID-19 and Russia-Ukraine War, we are continuously tracking and evaluating the direct as well as the indirect influence of the pandemic on different end use sectors. These insights are included in the report as a major market contributor.

The APAC Self-Retracting Personal Fall Limiter (PFL) market is expected at value of US\$ million in 2022 and grow at approximately % CAGR during 2022 and 2028.
