The fuel mix itself is changing dramatically as electric and hydrogen-powered vehicles hit the road. With format diversification, new products and services, a plethora of partners, increased competition, rising regulatory requirements and changing consumer behavior, petroleum retailers need to redesign and transform their front-of-house operations to keep up. At present, gas stations have experienced tremendous changes in terms of site formats, front-end operations, product and service provision, etc. The

traditional fuel retail industry has been changing rapidly, with formats such as big box stores, big box stores and convenience stores adopting new technologies in stores and forecourts to enable more personalized interactions and a pleasant refueling and shopping experience. More than 85% of gasoline sold in the United States now is at self-service stations, most of which are equipped with touch-screen devices and mobile apps, according to a global trade body serving the fuel retail industry.
