A Self-Supporting Storage System, often referred to as a silo storage system, is a type of storage facility where the storage racks themselves support the building structure. Unlike traditional warehouses where the building structure supports the racks, in a rack-supported warehouse, the racks are integrated into the building's structural framework. This design maximizes storage capacity and operational efficiency by utilizing the vertical space more effectively.

The global Self-Supporting Storage Systems market size is projected to grow from US\$ million in 2024 to US\$ million in 2030; it is expected to grow at a CAGR of % from 2024 to 2030.
