## Abstracts

The global Self-Tapping Cancellous Bone Locking Screw market size is predicted to grow from US\$ 467 million in 2025 to US\$ 712 million in 2032; it is expected to grow at a CAGR of 6.3% from 2026 to 2032.

The self-tapping cancellous bone locking screw is an orthopedic implant specifically designed for fixing cancellous bone (such as low-density bone areas like the distal femur, proximal tibia, and vertebral bodies). Its deep, wide-pitch threads enhance bone retention, and the locking thread at the head allows for angularly stable fixation with locking plates or intramedullary nails. The self-tapping tip allows for direct screwing into the bone without pre-tapping, improving surgical efficiency and reducing bone damage. The upstream of its supply chain includes medical-grade titanium alloys (such as Ti-6Al-4V ELI) or stainless steel bars, precision cold heading/machining equipment, and surface treatment service providers. The midstream consists of orthopedic companies with Class III medical device registration certificates, such as Weigao Orthopedics, DePuy Synthes, and Zimmer Biomet, which need to master material forming, heat treatment, cleaning and sterilization, and biocompatibility verification capabilities. The downstream primarily targets hospital trauma orthopedics and spinal surgery departments, entering clinical settings through distributors or centralized procurement channels. In 2024, the global production of self-tapping cancellous bone locking screws was approximately 4,941,176 units, with an average market price of approximately US\$85 per screw. Major manufacturers had gross margins of 50%–68% and a single production line capacity of 200,000 screws per year.

United States market for Self-Tapping Cancellous Bone Locking Screw is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Self-Tapping Cancellous Bone Locking Screw is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

Europe market for Self-Tapping Cancellous Bone Locking Screw is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
