Semiconductor equipment remarketing refers to the process of reselling pre-owned or surplus semiconductor manufacturing equipment. This industry specializes in acquiring used equipment from companies that may be upgrading their facilities, shutting down a production line, or otherwise have equipment that is no longer needed. The equipment is then refurbished, if necessary, tested to ensure it meets industry standards, and remarketed to new buyers at a lower cost compared to purchasing brand new equipment.

The global Semiconductor Equipment Remarketing market size is projected to grow from US\$ million in 2024 to US\$ million in 2030; it is expected to grow at a CAGR of %from 2024 to 2030.
