According to our LPI (LP Information) latest study, the global Semiconductor Package market size was valued at US\$ 28040 million in 2023. With growing demand in downstream market, the Semiconductor Package is forecast to a readjusted size of US\$ 42150 million by 2030 with a CAGR of 6.0% during review period.

The research report highlights the growth potential of the global Semiconductor Package market. Semiconductor Package are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Semiconductor Package. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Semiconductor Package market.

Semiconductor packaging is conducted to guarantee protection to the wafer or substrate. The packaging is built from materials such as plastic, metal, glass or ceramic and is composed of one or more semiconductor electronic components.

Semiconductor packaging materials are base players of discrete semiconductor devices and integrated circuits on which other layers are deposited to complete the circuit. Thinner core materials are ideally used to surro system applications.

The validation of lead substrates has increased in comparison to lead frames and bonding wires as the industry advances more towards leadless and cable-less packages.

The market will experience robust growth due to increased demand for smart mobile devices and electronic goods.

Following a strong growth of 26.2 percent in the year 2021, WSTS revised it down to a single digit growth for the worldwide semiconductor market in 2022 with a total size of US\$580 billion, up 4.4 percent. WSTS lowered growth estimation as inflation rises and end markets seeing weaker demand, especially those exposed to consumer spending. While some major categories are still double-digit year-over-year growth in 2022, led by Analog with 20.8 percent, Sensors with 16.3 percent, and Logic with 14.5 percent growth. Memory declined with 12.6 percent year over year. In 2022, all geographical regions showed double-digit growth except Asia Pacific. The largest region, Asia Pacific, declined 2.0 percent. Sales in the Americas were US\$142.1 billion, up 17.0% year-on-year, sales in Europe were US\$53.8 billion, up 12.6% year-on-year, and sales in Japan were US\$48.1 billion, up 10.0% year-on-year. However, sales in the largest Asia-Pacific region were US\$336.2 billion, down 2.0% year-on-year.
