The global Semiconductor Packaging Used Solder Paste market size is predicted to grow from US\$ 335 million in 2025 to US\$ 393 million in 2031; it is expected to grow at a CAGR of 2.7% from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

Solder paste is a suspension of solder particles in a solder flux, which is widely used in the electronic assembly materials.

At present, in the industrial developed countries the solder paste industry is generally at a more advanced level, the world's large enterprises are mainly concentrated in the USA, Europe and Japan. Meanwhile, these companies have more mature equipment, strong R & D capability, and the technical level is in a leading position. Solder Paste industry is a low concentration industry. As electronic foundry industry transfer to China mainland, many new entrants enter into this industry. At present, some Chinese enterprises occupy a relatively large international market share. Chinese companies represented by Tongfang Tech and Shenzhen Vital New Material have successively built standard chemical production bases, which have a strong first-mover advantage. Of the global major players of Solder Paste, MacDermid Alpha Electronics Solutions, Senju Metal Industry and Harima Chemicals captured the top three revenue share spots in the Solder Paste market in 2021. MacDermid Alpha Electronics Solutions dominated with 14.66% revenue share in 2021 with the acquisition of Kester, followed by Senju Metal Industry and Harima Chemicals with 12.22% and 6.61% revenue share, respectively. It is worth noting that Harima Chemicals acquired the solder paste

business of Heraeus in June 2022. This report combines the data of the two companies for statistics.

The solder paste industry is a mature industry. The largest sales market is China, due to the rapidly development of electronics industry, with 51.73% share in 2022. The demand in other region, such as Southeast Asia, is increasing rapidly. While in the electronics mature region, such as USA, Europe, the demanding of solder paste decline gradually, due to the production transfer of electronics products.
