The global Sensor LED Night Light market size is predicted to grow from US\$ 4285 million in 2025 to US\$ 8085 million in 2032; it is expected to grow at a CAGR of 9.5% from 2026 to 2032.

In 2025, global sensor LED night light production reached approximately 365 million units, with an average global market price of around US\$ 12 per unit.

The gross profit margin of major companies in the industry is between 35% ? 55%.

In 2025, the global production capacity of sensor LED night lights was approximately 486 million units.

Sensor LED night lights are compact lighting devices equipped with motion, infrared, or ambient light sensors that automatically activate illumination when movement or low-light conditions are detected. They are designed to provide soft, energy-efficient lighting for safety, navigation, and comfort during nighttime use in residential and commercial environments.

The industrial chain includes upstream LED chips, sensors, control ICs, power components, plastics, and diffusers. The midstream focuses on module assembly, housing molding, circuit integration, and functional testing. Downstream applications mainly include home lighting, children's rooms, elderly care facilities, hotels, corridors, stairways, and retail consumer markets.

The sensor LED night light market is expanding steadily as consumers prioritize energy efficiency, convenience, and safety in residential lighting solutions. Automatic activation

through motion or light sensors reduces unnecessary power consumption while improving nighttime visibility. Demand is driven by growing adoption in households with children and elderly residents, as well as applications in hotels and smart living spaces. Advances in sensor sensitivity, low-power LED technology, and compact design enhance product performance and affordability. Integration with smart home ecosystems and rechargeable power solutions further broadens usage scenarios. As smart lighting and home automation continue to gain popularity, sensor LED night lights are expected to maintain solid growth across global consumer markets.
