Sensory Switch (or adaptive switch) is an access device that allows people with movement-limiting disabilities to use technology and operate electronic devices. Instead of the person performing complex actions such as turning a knob, adaptive switches will offer easier movement solutions, such as pressing a button. It's possible to have a switch adapter for toys, home appliances, voice-output communication tools, computers and more.

Gone are the days when most tasks required manual labor. With advancements in technology, the world is becoming a more inclusive place that can accommodate all individuals. Although some people believe that technology is taking over the employment market. Technology in reality is a mere tool that is creating a new avenue of jobs every day. With the power of assistive technology, users with major and minor disabilities are still able to compete for secure jobs. This has made plenty of lives easier and better. One such invention is the Sensory Switch (adaptive switch).
