## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

Server hosting refers to the hosting of your server and related equipment to a network data centre with perfect server room facilities, high quality network environment, rich bandwidth resources and operational experience, as well as real-time monitoring of the user's network and equipment in order to improve the access speed of your website, so that the system can achieve the purpose of safe, reliable, stable and efficient operation.

The server rental can get the whole server resources at a reasonable cost by renting the server provided by the hosting provider. High reliability, good performance, more secure, but the price is relatively high, suitable for the high volume of visits to the site or the site of high requirements for security and stability.
