SF6 gas leakage monitoring sensor is a sensor specially used to detect and monitor SF6 gas leakage. It can monitor the concentration of SF6 gas in real time and give early warning of leakage to prevent gas leakage from causing danger to equipment and personnel. SF6 gas leakage monitoring sensors are often based on the principle of infrared rays, using non-chromatic dispersion infrared spectroscopy technology, which

can measure the absorption line of SF6 gas at a wavelength of 5.23 μ m. By comparing with the standard curve determined in advance, the concentration of SF6 gas can be accurately determined, so as to monitor and warn the actual gas leakage. In addition, the SF6 gas leakage monitoring sensor also has the characteristics of height, quick response, and anti-drying.
