The global Shipboard Automatic Identification Systems market size is predicted to grow from US$ 59.8 million in 2025 to US$ 71.9 million in 2031; it is expected to grow at a CAGR of 3.1% from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

An Automatic Identification System Market is designed to enable two-way communication between various vessels and onshore-based coastal authorities. The system is capable of providing static, dynamic, and voyage data about a ship to other ships in the vicinity and to nearby coastal authorities.

There are two classes of AIS unit fitted to vessels, Class A and Class B. Class A units are a mandatory fit under the safety of life at sea (SOLAS) convention to vessels above 300 gross tons or which carry more than 11 passengers in International waters. Many other commercial vessels and some leisure craft also fit Class A units. Class B units are currently not a mandatory fit but authorities in several parts of the world are considering this. Class B units are designed for fitting in vessels which do not fall into the mandatory Class A fit category.

SRT Marine and Alltek Marine are the top two manufacturers in the AIS Transponder market in 2022. SRT Marine dominated with about 23% global revenue share, followed by Alltek Marine with about 21% global revenue share. Other key players include Furuno, Navico, Garmin, Icom, Japan Radio Company, Vesper Marine, Comnav Marine, True Heading and among others.
