Abstracts

The global Shoe Horn market size is predicted to grow from US$ 1037 million in 2025 to US$ 1624 million in 2032; it is expected to grow at a CAGR of 6.7% from 2026 to 2032.

In 2024, the global production of shoehorns was estimated at 150 million to 300 million units, with an average selling price of approximately $1 to $30 per unit and a gross profit margin of about 40%. Single-line production capacity was estimated at 500,000 to 3 million units per year. A shoehorn is a tool specifically designed to help people put on shoes easily, especially leather shoes, boots, and other footwear with tight heels that are difficult to slip on. It provides a smooth transition surface, allowing the heel to slide smoothly into the shoe without crushing the upper or damaging the heel. The upstream of the shoehorn industry consists of raw material suppliers such as metals, plastics, wood, and horn; the midstream consists of manufacturing companies that process the raw materials into finished products through processes such as stamping, injection molding, or carving; and the downstream reaches consumers through department stores, online e-commerce platforms, hotel supply suppliers, and footwear brand accessories. The demand stems from individual consumers' daily need for convenient and protective footwear. For the elderly, pregnant women, and other groups with difficulty bending over, it serves as an important daily living aid. Shoehorns are particularly useful for those who have recently undergone hip or knee replacement surgery, as well as those suffering from chronic upper or lower back pain. Wheelchair users can also benefit. Furthermore, the hotel industry makes bulk purchases to enhance service experiences, and shoemakers often use them as product accessories or promotional gifts. Overall demand is driven by improvements in people's quality of life, increased health awareness, and related industry service standards.

United States market for Shoe Horn is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.
