Shooting gloves are specialized protective gear designed to improve firearm handling by offering enhanced grip, trigger control, dexterity, and protection against recoil, abrasions, and environmental factors such as heat, cold, and moisture. They are commonly made from durable materials like leather, synthetic textiles (nylon, polyester, Kevlar®), neoprene, and breathable mesh, often reinforced with padding, silicone grips, or touchscreen-compatible fingertips. The supply chain begins with raw materials—including textiles, leather, polymers, foams, and coatings. Manufacturing is carried out through precision stitching, molding, and finishing in specialized garment and tactical equipment factories, with distribution channels spanning defense and tactical suppliers, sporting goods retailers, and e-commerce platforms, ultimately serving military personnel, law enforcement officers, hunters, competitive shooters, and recreational firearm enthusiasts.
