Side Slip Tester is a diagnostic device used primarily in automotive maintenance and inspection to measure the lateral movement or 'side slip' of a vehicle's wheels while it travels in a straight line. This test helps assess the alignment of the wheels, indicating whether the vehicle tends to drift to one side due to misalignment or uneven suspension geometry. The side slip tester typically consists of a set of plates or rollers installed in the floor that measure lateral deviation as a vehicle drives over them. Accurate side slip measurements are essential for ensuring vehicle safety, handling performance, and tire longevity.
