Silencer paste typically refers to a type of adhesive or lubricant used in automotive applications, particularly for assembling brake components such as brake pads and calipers. It's applied to the back of brake pads or other components to reduce noise and vibration, similar to how a silencer shim functions. The paste helps dampen vibrations and prevent brake squeal, ensuring a quieter braking experience. Additionally, it may provide lubrication to aid in the smooth movement of components and reduce wear.

The global Silencer Paste System market size is projected to grow from US\$ million in 2024 to US\$ million in 2030; it is expected to grow at a CAGR of % from 2024 to 2030.
