The report requires updating with new data and is sent in 48 hours after order is placed.

The global Silicon Photonics Wafer Foundry Service market size is predicted to grow from US$ 233 million in 2025 to US$ 1217 million in 2031; it is expected to grow at a CAGR of 31.7% from 2025 to 2031.

Silicon photonic devices can be made using existing semiconductor fabrication techniques, and because silicon is already used as the substrate for most integrated circuits, it is possible to create hybrid devices in which the optical and electronic components are integrated onto a single microchip. Silicon photonic wafers are the raw materials for making silicon photonic devices.

At present, Silicon Photonics Wafer Foundry have been widely used in the Data centre industry. The main production enterprises are concentrated in the Asia-Pacific region. The top three companies account for more than 97% of the global revenue market share. In 2022, TSMC occupied the largest revenue market share in the world with 68.08%, followed by GlobalFoundries and Silex Microsystems with 26.75% and 2.29% global revenue market share, respectively.
