According to our LPI (LP Information) latest study, the global Silicon Ring market size was valued at US\$ 324.4 million in 2023. With growing demand in downstream market, the Silicon Ring is forecast to a readjusted size of US\$ 744.7 million by 2030 with a CAGR of 12.6% during review period.

The research report highlights the growth potential of the global Silicon Ring market. Silicon Ring are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Silicon Ring. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Silicon Ring market.

Silicon rings for etching are mainly used on 8-12 inches (i.e., 200mm-300mm) plasma etcher. In the manufacturing process of integrated circuits, high-purity silicon components and wafers are made of silicon, which makes the electrical properties of etching more uniform, so silicon rings are widely used in semiconductor etchers. The periodic consumption of silicon ring products has become an important consumable component in the wafer processing process, which directly affects the electrical properties of the wafer. The main technical requirements of the silicon ring include electrical parameters (i.e., conductivity type, resistivity, and radial resistivity change), geometric size, crystallographic orientation, and degree of deviation from crystallographic orientation, oxygen content, carbon content, crystal defects, surface quality, surface roughness.

Global main manufacturers of silicon ring include Silfex, Hana Silicon and CoorsTek,

etc. The top three players hold a share about 65%. South Korea is the largest producer, holds a share around 29%, followed by North America and China, with share 28% and 20%, separately. The largest market is Asia-Pacific, has a share about 68%, followed by North America and Europe, with around 21% and 8% market share respectively.
