Silicone Release Agent is a high-performance coating material, mainly used to prevent adhesion and facilitate separation. It has low surface energy and high stability, which can effectively prevent the adhesion between various materials (such as paper, plastic, metal, etc.). This coating is widely used in industrial production, such as in papermaking, plastic film, adhesive and label manufacturing, to ensure the smooth demolding and separation of products during processing and use. Organic silicone release coating also has good heat resistance, chemical corrosion resistance and mechanical stability, enabling it to maintain excellent performance in various harsh environments.
