The global Silicone Thermoplastic Elastomers market size is predicted to grow from US\$ 77.16 million in 2025 to US\$ 111 million in 2032; it is expected to grow at a CAGR of 5.4% from 2026 to 2032.

Silicone thermoplastic elastomer (SI-TPV) is a composite material that combines the excellent properties of silicone rubber with the processing advantages of thermoplastics. This material is formed by uniformly dispersing vulcanized cross-linked silicone rubber microparticles within a thermoplastic material, and features high strength, high elasticity, high temperature resistance, good weather resistance, non-stick surface, and recyclability.

The main raw materials include silicone rubber and thermoplastics. The product is manufactured by uniformly dispersing vulcanized silicone rubber microparticles within the thermoplastic material using dynamic vulcanization crosslinking technology. The market for silicone thermoplastic elastomers is concentrated in the hands of international giants, with global sales reaching several thousand tons in 2024 and an average market price of approximately \$23 per kilogram. The industry's gross profit margin ranges from 15% to 30%.

Silicone thermoplastic elastomer (SI-TPV) is the world's first thermoplastic silicone elastomer developed by Dow Corning, formed by vulcanized silicone rubber particles on a thermoplastic substrate. Through special compatibility and dynamic vulcanization technologies, it overcomes the incompatibility problem between TPU and silicone, resulting in performance far superior to ordinary thermoplastic vulcanizates (TPV). Si-

TPV possesses high biocompatibility and excellent encapsulation properties, combining the low hardness, high and low temperature resistance, chemical resistance, and high resilience of silicone rubber with the outstanding mechanical strength and good biocompatibility of TPU, making it suitable for applications in wearable devices, medical devices, and other specialized fields.

With people's increasing pursuit of quality in health, medical and healthcare equipment and daily necessities, and the arrival of the 5G intelligent era, Si-TPV undoubtedly has broad market prospects.
