Silk screen mesh is a woven fabric made from polyester, nylon, or stainless steel, specifically designed for use in the screen printing process. The mesh is tightly stretched and attached to a frame, creating a screen that acts as a stencil for transferring ink onto a substrate to create a printed image or design. Screen printing is commonly used in the textile industry for apparel printing, as well as in various other industries for printing on paper, plastics, glass, ceramics, and more. The quality and proper tensioning of the silk screen mesh play a significant role in achieving sharp and vibrant prints in the screen printing process.
