The global Silver Epoxy Adhesive market size is predicted to grow from US\$ million in 2025 to US\$ million in 2031; it is expected to grow at a CAGR of % from 2025 to 2031.

Silver epoxy resin adhesive is a high-performance adhesive used for bonding materials such as metals, plastics, ceramics, etc. It is composed of an epoxy resin matrix and fillers such as silver powder, and has excellent conductivity and corrosion resistance. Silver epoxy resin adhesive usually needs to be used for a certain period of time after mixing, which is commonly referred to as the 'stirring life', during which the adhesive's performance is optimal. When using silver epoxy resin adhesive, the following points should be noted: the bonding surface should be clean, dry, and free of impurities such as oil and dust. Before bonding, the silver epoxy resin adhesive should be thoroughly stirred to ensure that the filler and matrix are fully mixed. When bonding, the amount of adhesive should be controlled to avoid excessive or insufficient use. After bonding, a certain curing time should be carried out to ensure the optimal performance of the adhesive. It should be noted that silver epoxy resin adhesives usually need to be used under specific temperature and humidity conditions and should be operated according to the product instructions. Meanwhile, due to the certain toxicity of silver epoxy resin adhesive, corresponding safety measures should be taken when using it, such as wearing gloves, masks, etc.
