The global Silver-Loaded Zirconium Phosphate market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of % from 2026 to 2032.

Silver-loaded zirconium phosphate is a laminated zirconium phosphate carrier which has the advantages of high safety and heat resistance, good chemical stability and can be added to all types of resins to act as an antibacterial agent. It can provide efficient broad-spectrum sterilisation and removal of all types of bacteria. Due to the smaller particle size and better heat resistance of this inorganic antibacterial powder, it is particularly suitable for use in melt spinning of synthetic fibres (e.g. polyester, polypropylene, nylon, etc.) and in ceramic products where higher heat resistance is required.
