Silver oxide powder is a black powder. As one of the main materials of batteries, silver oxide is highly favored for its high energy density, long life and stability. Coin battery is a high-performance battery type currently widely used in small portable devices. It is mainly used in watches, calculators, hearing aids, remote controls and some other small electronic devices.

With the popularity of smartwatches and other wearable devices, the demand for small, high-energy-density batteries continues to grow, and silver oxide batteries occupy an important position in this market. As the demand for hearing aids and other equipment in an aging society increases, the market demand for silver oxide batteries has also risen. Compared with other battery types (such as lithium batteries), silver oxide batteries may face more environmentally friendly problems and waste disposal problems. Some manufacturers are gradually considering green production processes during the production process.
