The global Simulators FTD Level 2 market size is predicted to grow from US\$ 345 million in 2025 to US\$ 608 million in 2032; it is expected to grow at a CAGR of 8.5% from 2026 to 2032.

A Simulators FTD Level 2 refers to a Level 2 flight training device that meets civil aviation training grading standards. It is used for pilots' initial procedural training and basic operational skills development. This level of simulator features highly realistic flight control characteristics, controllable weather environments, navigation systems, and simulation of some airborne systems, but it does not need to achieve the six degrees of freedom motion of a full-motion simulator. Level 2 FTD simulators are typically used for procedural operations, normal/abnormal procedure training, and preliminary instruction for some aircraft type conversions, reducing operating costs while ensuring training quality.

The Simulators FTD Level 2 industry chain extends from upstream key component and software suppliers (high-resolution vision systems, flight dynamics and avionics simulation software, control loading and cockpit panels, chassis/structural components and power supply cooling, etc.) to midstream system integration and certification (simulator manufacturers perform whole-machine debugging and qualification certification according to FAA/EASA requirements), and then to downstream training centers/flight schools (purchase, leasing and operation), after-sales maintenance and content/software upgrade services, forming a closed loop of 'components ? integration ? certification ? sales/leasing ? operation/maintenance/upgrade'. Industry gross profit varies significantly depending on the stage: market reports for complete machines and high-end visual equipment give a gross profit range of approximately 35%–45% for the 'flight simulator' category (market gross profit under the reporting scope), while leading

manufacturers such as CAE have corporate-level gross profit margins of approximately 25%–30% (reflecting the lower reported gross profit margin after the combination of hardware manufacturing and services).

In 2025, global production of Simulators FTD Level 2 reached 235 units, with an average selling price of US\$1.5 million per unit.

United States market for Simulators FTD Level 2 is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Simulators FTD Level 2 is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

Europe market for Simulators FTD Level 2 is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

Global key Simulators FTD Level 2 players cover FTD.Aero, SoftekSim, MPS, Entrol, CAE, etc. In terms of revenue, the global two largest companies occupied for a share nearly % in 2025.
