## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

The single axis tracker is an alternative to fixed tilt solar panels. Increasingly, single-axis trackers are being chosen because their biggest benefit is an increase in energy production of around 10-30% due to following the sun throughout the day. Considering the additional ground, installation, operation and maintenance costs, single-axis trackers are the most common tracking system available today. However, the benefits of single-axis trackers also depend on a number of factors such as the local latitude and the financial dictates of the project.

The global market for Single Axis Tracker is estimated to increase from US\$ million in 2021 to reach US\$ million by 2028, exhibiting a CAGR of % during 2022-2028. Keeping in mind the uncertainties of COVID-19 and Russia-Ukraine War, we are continuously tracking and evaluating the direct as well as the indirect influence of the pandemic on different end use sectors. These insights are included in the report as a major market contributor.

The APAC Single Axis Tracker market is expected at value of US\$ million in 2022 and grow at approximately % CAGR during 2022 and 2028.

The United States Single Axis Tracker market is expected at value of US\$ million in 2022 and grow at approximately % CAGR during 2022 and 2028.

The Europe Single Axis Tracker market is expected at value of US\$ million in 2022 and grow at approximately % CAGR during 2022 and 2028.

The China Single Axis Tracker market is expected at value of US\$ million in 2022 and grow at approximately % CAGR during 2022 and 2028.
