A single-shaft paddle mixer is an industrial mixing machine designed for the efficient blending, mixing, and homogenization of bulk materials. It features a single, horizontally oriented shaft equipped with paddle-shaped blades or agitators that extend radially from the shaft. The shaft and paddles rotate within a stationary, U-shaped trough or container.

Integration of automation technologies, such as programmable logic controllers (PLCs) and Human-Machine Interfaces (HMIs), to improve process control, recipe management, and data monitoring. This allows for precise control of mixing parameters and the ability to capture and analyze real-time data for quality assurance.
