The single-swing milling head is a flexible processing attachment specifically designed for milling machines. Its design allows the milling machine spindle to swing in a plane, enabling it to perform multi-angle and complex shape cutting. There are various types of single pendulum milling heads, including fixed angle, adjustable angle, automatic swing, multi-function, high speed, heavy and small, etc. to meet different processing needs. By precisely adjusting the angle of the milling head, the processing of inclined planes, curved surfaces and complex parts can be completed in one clamping, significantly improving processing efficiency and flexibility.

The global Single Swing Milling Head market size is projected to grow from US\$ million in 2024 to US\$ million in 2030; it is expected to grow at a CAGR of % from 2024 to 2030.
