The global Single Track Manual Tile Cutter market size is predicted to grow from US\$ 121 million in 2025 to US\$ 151 million in 2031; it is expected to grow at a CAGR of 3.7% from 2025 to 2031.

Manual tile cutters are used to make straight, precise cuts in ceramic, porcelain and terracotta tiles. Manual tile saws use a round cutting wheel that is drawn along a rigid base using a metal lever handle.

A monorail manual tile cutter is a hand tool used for cutting materials such as tiles, ceramics, and marble. Compared with the double track manual tile cutter, it has only one cutting track. The cutting machine has only one cutting track, which is used to support and guide the cutting wheel for straight cutting, and is suitable for the cutting needs of general-sized tiles. This is a hand-operated cutting tool that does not require electrical or pneumatic power sources, is easy to operate, and is suitable for both indoor and outdoor use. The monorail manual tile cutter is capable of cutting tiles of different sizes and thicknesses, suitable for general renovation and construction works. By adjusting the positions of the cutting wheel and the cutting track, precise cutting can be achieved to ensure straight and accurate cutting edges. This cutting machine usually has a lightweight design, which is easy to carry and move, and is convenient to use in different places.
