The global Single-Use Balloon Inflation Pressure Pump market size is predicted to grow from US\$ 94.95 million in 2025 to US\$ 144 million in 2032; it is expected to grow at a CAGR of 6.3% from 2026 to 2032.

A single-use balloon inflation pressure pump is a sterile consumable specifically designed for precise control of the inflation pressure of balloon catheters (such as PTA balloons and ureteral dilation balloons) during interventional procedures. It typically consists of a high-pressure syringe, pressure gauge, one-way valve, and connector, providing a controllable pressure of 0–20 atm (or higher) to ensure safe and effective balloon inflation without rupture. The upstream of its supply chain includes suppliers of medical-grade engineering plastics (such as PC and ABS), precision pressure sensors (for some high-end models), silicone seals, and injection molds. The midstream consists of companies with Class II medical device manufacturing qualifications, requiring expertise in airtight assembly, pressure calibration, and sterilization validation processes. The downstream primarily targets hospital interventional departments, urology departments, cardiology departments, and third-party surgical centers, entering clinical settings through distributors or centralized procurement channels. Due to the relatively standardized product structure but high requirements for safety and precision, the industry's overall gross profit margin is approximately 40%–60%. As of 2025, the average market price was between ?180 and ?400 per unit, with mainstream domestic products mostly priced between ?200 and ?300, while imported or high-end models with digital pressure displays could reach over ?500. Some centralized procurement bids have seen prices drop to around ?150. In 2024, the global production of disposable balloon-expanded pressure pumps was approximately 2,190,000 units, with a global average price of approximately US\$42 per unit. The single-line production capacity is 70,000 units per year.

United States market for Single-Use Balloon Inflation Pressure Pump is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Single-Use Balloon Inflation Pressure Pump is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

Europe market for Single-Use Balloon Inflation Pressure Pump is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
