Single-use systems (SUS) refers to biopharmaceutical manufacturing (bioprocessing) equipment designed to be used once (or for a single manufacturing campaign) and then discarded. Generally, SUS equipment is composed primarily of plastic components that have been sealed and sterilized using gamma irradiation. Single-use bioprocess bags provide a streamlined way to enhance your manufacturing productivity. By offering strength, durability, and temperature resistance, a single use bioprocess bag has the durability to withstand human and machine handling via specialized pharmaceutical equipment.
