The report requires updating with new data and is sent in 48 hours after order is placed.

The global Single-use Bioreactor Systems market size is predicted to grow from US\$ 228 million in 2025 to US\$ 279 million in 2031; it is expected to grow at a CAGR of 3.4% from 2025 to 2031.

A single-use bioreactor or disposable bioreactor is a bioreactor with a disposable bag instead of a culture vessel. Typically, this refers to a bioreactor in which the lining in contact with the cell culture will be plastic, and this lining is encased within a more permanent structure (typically, either a rocker or a cuboid or cylindrical steel support). Commercial single-use bioreactors have been available since the end of the 1990s and are now made by several well-known producers (See below).

Global Single-Use Bioreactors key players include Sartorius, GE Healthcare, Eppendorf, Pall(Danaher), etc. Global top four manufacturers hold a share over 40%.

USA is the largest market, with a share about 25%, followed by China, and Germany, both have a share about 40 percent.

In terms of product, Wave-induced Motion SUBs is the largest segment, with a share about 75%. And in terms of application, the largest application is R&D, followed by Biopharmaceutical Manufacturers.
