SIS hot melt adhesive refers to a type of adhesive that is based on a styrene-isoprene-styrene (SIS) block copolymer. Hot melt adhesives are thermoplastic adhesives that are solid at room temperature but melt and become fluid when heated. They provide strong bonding capabilities and are widely used in various industries.

The SIS hot melt adhesive market has been experiencing steady growth in recent years due to its wide range of applications and advantages in bonding various substrates. The demand for SIS hot melt adhesives is driven by various industries such as packaging, woodworking, automotive, footwear, and electronics. These industries rely on efficient and reliable bonding solutions for their manufacturing processes, contributing to the growth of the SIS hot melt adhesive market.

The packaging industry is one of the major consumers of SIS hot melt adhesives. These adhesives are used for bonding cartons, boxes, trays, labels, and other packaging materials. With the growth of e-commerce, the demand for secure and efficient packaging solutions is increasing, thereby driving the market for SIS hot melt adhesives.
