Skate shoes or skateboard shoes are a type of footwear specifically designed and manufactured for use in skateboarding.

The roller skating shoes will continue its dominance in the skating shoes market in the product segment and is likely to occupy more than 80% of the total market share by 2023. These shoes are also called quad skates, due to the presence of four wheels, placed two at the front and two at the rear. The roller skating shoes have a rubber cushion, which enables skaters with greater maneuverability and helps skate in a curved line by just tilting their body to one side. The revival of roller derby and artistic skating will boost the participation rates in roller skating, resulting in further growth of this segment during the predicted period.
