The global SLAM Technology market size is predicted to grow from US\$ 657 million in 2025 to US\$ 3844 million in 2031; it is expected to grow at a CAGR of 34.2% from 2025 to 2031.

SLAM is a technology used in computer vision technologies which gets the visual/laser sensor data from the physical world in shape of points to make an understanding for the machine.

SLAM (Simultaneous Localization and Mapping) technology is often compared to GPS technology, or it can be said that SLAM technology is a supplement to GPS technology. In a room, or a table, or a small intersection, GPS technology usually has accuracy down to a meter, but cannot reach to the centimeter or millimeter.

SLAM Technology market now has nearly 100 players, most of them are located in USA, EU and China. Because Google, Apple and Facebook do not provide products that mainly take the tech of SLAM, and some of them are open sourced or not on a commercial scale.

Europe is the largest region of SLAM Technology in the world in the past few years and it will keep increasing in the next few years. Europe market took up about 42% the global market in 2018, while USA and China were about 30%, 8%.
