## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

The sleep buster is a device designed to reduce overwork driving and resulting traffic accidents as an overall support to safe driving journeys.

A pad with a built-in sensor installed on the driver's seat constantly monitors the level of driver fatigue. Based on algorithms to judge and analyze the monitored data, sleep buster issues warnings on-screen and by speaker when the driver's concentration declines or the driver's physical condition changes (signals predictive of the onset of sleep).
