Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

Sleep capsule, also known as sleeping cabin or napping cabin, is a special type of structure or chair, usually used in company/workplace environments, hospitals and universities to allow people to nap. Users use the pod for private sleep, usually with the help of technology and environmental functions. Sleep capsules have appeared in enterprise environments, hospitals, universities, airports and other public places. Research shows that a 20 minute nap can reduce fatigue symptoms, improve energy levels, improve attention, productivity, mood, enhance learning, reduce stress, and reduce the risk of cardiovascular disease.
