A Sliding Circular Saw, also known as a sliding table saw, is a specialized type of circular saw designed for making precise cuts in wood and other sheet materials. Unlike a standard benchtop circular saw, a sliding circular saw has a saw mounted on a carriage that slides along a track system. This allows the saw blade to be moved back and forth across the material, enabling wider rip cuts than the blade diameter itself.

The global Sliding Circular Saw market size is projected to grow from US\$ million in 2024 to US\$ million in 2030; it is expected to grow at a CAGR of %from 2024 to 2030.
