The Production is about 60,000 units. Sliding Rail Exhaust Systems are vehicle exhaust extraction solutions installed on overhead rails, allowing sliding exhaust nozzles or trolleys to connect automatically or semi-automatically to vehicle tailpipes and continuously capture exhaust gases as vehicles move through workshops, garages, or testing lanes. These systems typically consist of overhead rails, trolley assemblies, high-temperature hoses, centralized fans and ducting, and control and safety devices, and are widely used in fire stations, bus and truck depots, inspection lanes, and high-throughput maintenance facilities. Their key advantages include support for moving vehicles, long coverage distances, and efficient use of overhead space, making them ideal for multi-bay and drive-through operations.
