The report requires updating with new data and is sent in 48 hours after order is placed.

According to our (LP Info Research) latest study, the global Slow Fashion market size was valued at US\$ million in 2022. With growing demand in downstream market and recovery from influence of COVID-19 and the Russia-Ukraine War, the Slow Fashion is forecast to a readjusted size of US\$ million by 2029 with a CAGR of % during review period.

The research report highlights the growth potential of the global Slow Fashion market. With recovery from influence of COVID-19 and the Russia-Ukraine War, Slow Fashion are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Slow Fashion. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Slow Fashion market.

Slow fashion is an awareness and approach to fashion that carefully considers the processes and resources required to make clothing, and focusses on timeless, high-quality designs over trend-driven pieces destined for the landfill after a few wears.
