A slurry ice system is a refrigeration technology that produces a semi-liquid mixture of tiny ice crystals suspended in water or another liquid, known as slurry ice. This type of ice offers superior cooling efficiency due to its high heat transfer rate and ability to flow like a liquid, allowing it to evenly and rapidly cool products or surfaces. Slurry ice is widely used in industries such as food processing, seafood preservation, supermarkets, and HVAC systems, where precise and uniform cooling is essential. Its flowable nature enables easy pumping and distribution, reducing mechanical handling and minimizing product damage.
