Small animal ventilators are most suitable for small animals' volume circulatory pressure respirators, and can also be extended to large animals such as guinea pigs. It is easy to operate, only need to set the breathing rate, ventilation volume and flow rate to measure. In addition, it is equipped with a pressure sensor, which can set the air pressure into the lungs. When the air pressure reaches the set value, the inspiratory action ends, effectively protecting the lungs of small animals.
