The global Small Magnetic Toroidal Coil market size is predicted to grow from US$ million in 2025 to US$ million in 2032; it is expected to grow at a CAGR of %from 2026 to 2032.

A small magnetic toroidal coil, often simply referred to as a toroidal coil, is a type of electromagnetic coil that is wound in a toroidal or donut-shaped form.

Small magnetic coils are commonly used in various applications, including electronics, telecommunications, power supplies, and more. The demand for smaller and more compact magnetic toroidal coils has been on the rise, especially in applications like smartphones, wearables, and IoT devices. As electronic devices continue to become smaller and more portable, the market for miniaturized toroidal coils has grown.With the increasing adoption of wireless charging technologies for smartphones, electric vehicles, and other electronic devices, there has been a growing demand for toroidal coils designed for wireless power transfer applications. These coils are used in transmitter and receiver units of wireless charging systems.The expansion of telecommunication networks and the deployment of 5G technology have driven demand for toroidal coils in RF (Radio Frequency) applications. These coils are used in filters, amplifiers, and impedance matching circuits.
