The concept of 'mini warehouse' was born in foreign countries. It was initially specially designed for individual moving and business trips and the storage of corporate materials, and was later introduced to China. With the development of domestic e-commerce, the demand for three-party warehouses from small and medium-sized e-commerce and wholesalers has increased. The demand characteristics of high frequency and small batches have led to the emergence of micro warehouses. Small and medium-sized micro warehouses are a unitized warehousing form that simplifies traditional warehousing for small, medium and micro enterprises and individuals. In the warehousing industry, warehousing of more than 5,000 square meters is defined as large and medium-sized warehousing, while small, medium and micro warehouses specifically refer to small warehousing of 100-1,000 square meters. According to the classification of small and medium-sized micro warehouse operation models, it can be divided into two types: hosting leasing and agency operation. Customers of small and medium-sized micro warehouses can be divided into two categories: B-end users and C-end users.
