The global Small Molecule Drug CDMO market size is predicted to grow from US\$ 31980 million in 2025 to US\$ 48100 million in 2032; it is expected to grow at a CAGR of 6.1% from 2026 to 2032.

A CDMO is a company dedicated to providing drug development and manufacturing services for the pharmaceutical and biotechnology industries. CDMO activities can broadly be divided into four fields: product development, manufacture of active pharmaceutical ingredients (API), manufacture of finished dosage forms (FDF) and pharma packaging.

The global pharmaceutical market is 1475 billion USD in 2022, growing at a CAGR of 5% during the next six years. The pharmaceutical market includes chemical drugs and biological drugs. For biologics is expected to 381 billion USD in 2022. In comparison, the chemical drug market is estimated to increase from 1005 billion in 2018 to 1094 billion U.S. dollars in 2022. The pharmaceutical market factors such as increasing demand for healthcare, technological advancements, and the rising prevalence of chronic diseases, increase in funding from private & government organizations for development of pharmaceutical manufacturing segments and rise in R&D activities for drugs. However, the industry also faces challenges such as stringent regulations, high costs of research and development, and patent expirations. Companies need to continuously innovate and adapt to these challenges to stay competitive in the market and ensure their products reach patients in need. Additionally, the COVID-19 pandemic has highlighted the importance of vaccine development and supply chain management, further emphasizing the need for pharmaceutical companies to be agile and responsive to emerging public health needs.
